GeoJump Announces

## GeoJump's Full-Service Launch Program

and

## Space-Asset-Backed Finance Fund

GeoJump, Inc. announces the GeoJump Space-Asset-Backed Finance Fund, the industry's first fund for SmallSats and hosted payload going to *GEO and Beyond*. The fund provides up to 100% of the "end-to-end" capital requirements for SmallSats and hosted payloads flying in the GeoJump Full-Service Launch Program.

Eligible missions need to meet the following minimum requirements:

- Payload of 200kg or less needing to go to *GEO and Beyond*
- Contract for a GeoJump Full-Service Launch (acquisition, registration, insurance, integration, and launch)
- Paying customer (government or commercial) providing reliable revenue cash-flow
- Clear title to the payload allowing for priority lien over the payload

See [www.GeoJump.Space](http://www.GeoJump.Space) for a fuller description of the GeoJump Full-Service Launch Program and the GeoJump Space-Asset-Back Finance Fund.

GeoJump’s Chief Technology Officer and Co-Founder, **Isa Fritz**, said about the GeoJump Full-Service Launch Program that “a lot of SmallSat and hosted payload owners are looking to have the stress of the financial, regulatory and launch services provided by one party and focus only on the program development that directly matters to the company’s roadmap. For smaller companies, having a one-stop shop with a GeoJump Full-Service Launch makes accessing *GEO and Beyond* possible.”

**Donald Moore**, GeoJump’s Chief Executive Officer and Co-Founder, added that “there is no other asset-based finance provider in the space sector”. Further, he noted, that “together with the GeoJump Full-Service Launch Program, the GeoJump Space-Asset-Backed Finance Fund’s 100% financing capabilities means that any company, large or small, can obtain all the capital required for its *GEO and Beyond* missions.”

*GeoJump, Inc.* is a provider of launch services to *GEO and Beyond* using lunar flybys and orbital transfer vehicles. Payloads may be deployed or hosted and have the option to use GeoJump’s operations services.

*GeoJump Space Finance Corporation* is owned by GeoJump, Inc. and a U.S. registered lender and investment bank.

**Contact:** Parties interested in the **GeoJump Full-Service Launch Program** and the **GeoJump Space-Asset-Backed Finance Fund** please contact GeoJump leadership:
